

**WATER
REVOLUTION
FOUNDATION**

Sustainable solutions

Verified by WRF

Our Mission

Initiated from within the yachting sector to drive and accelerate sustainability through collaboration and innovation and preserving the world's precious oceans.

Our Mission in practice

Yachting can and should lead the adoption of environment friendly solutions.

Promoting Sustainable Solutions

- > A central database of sustainable solutions
- > Solutions for new-build, operations and refit stages
- > Verified solutions only
- > LCA methodology for verification process
- > Assessment by accredited institutes

VERIFICATION PROCESS IN A NUTSHELL

1. PRODUCT SUBMISSION
understand the solution

2. DEFINITION OF THE SCOPE
determine the main variables

3. DETAILED INPUT DATA
collect the information

4. ASSESSMENT
calculate the impact

5. VERIFICATION
compare the impact

6. REVIEW AND OPTIMIZE
understand the outcomes

Confidential report

VERIFICATION PROCESS IN DETAIL

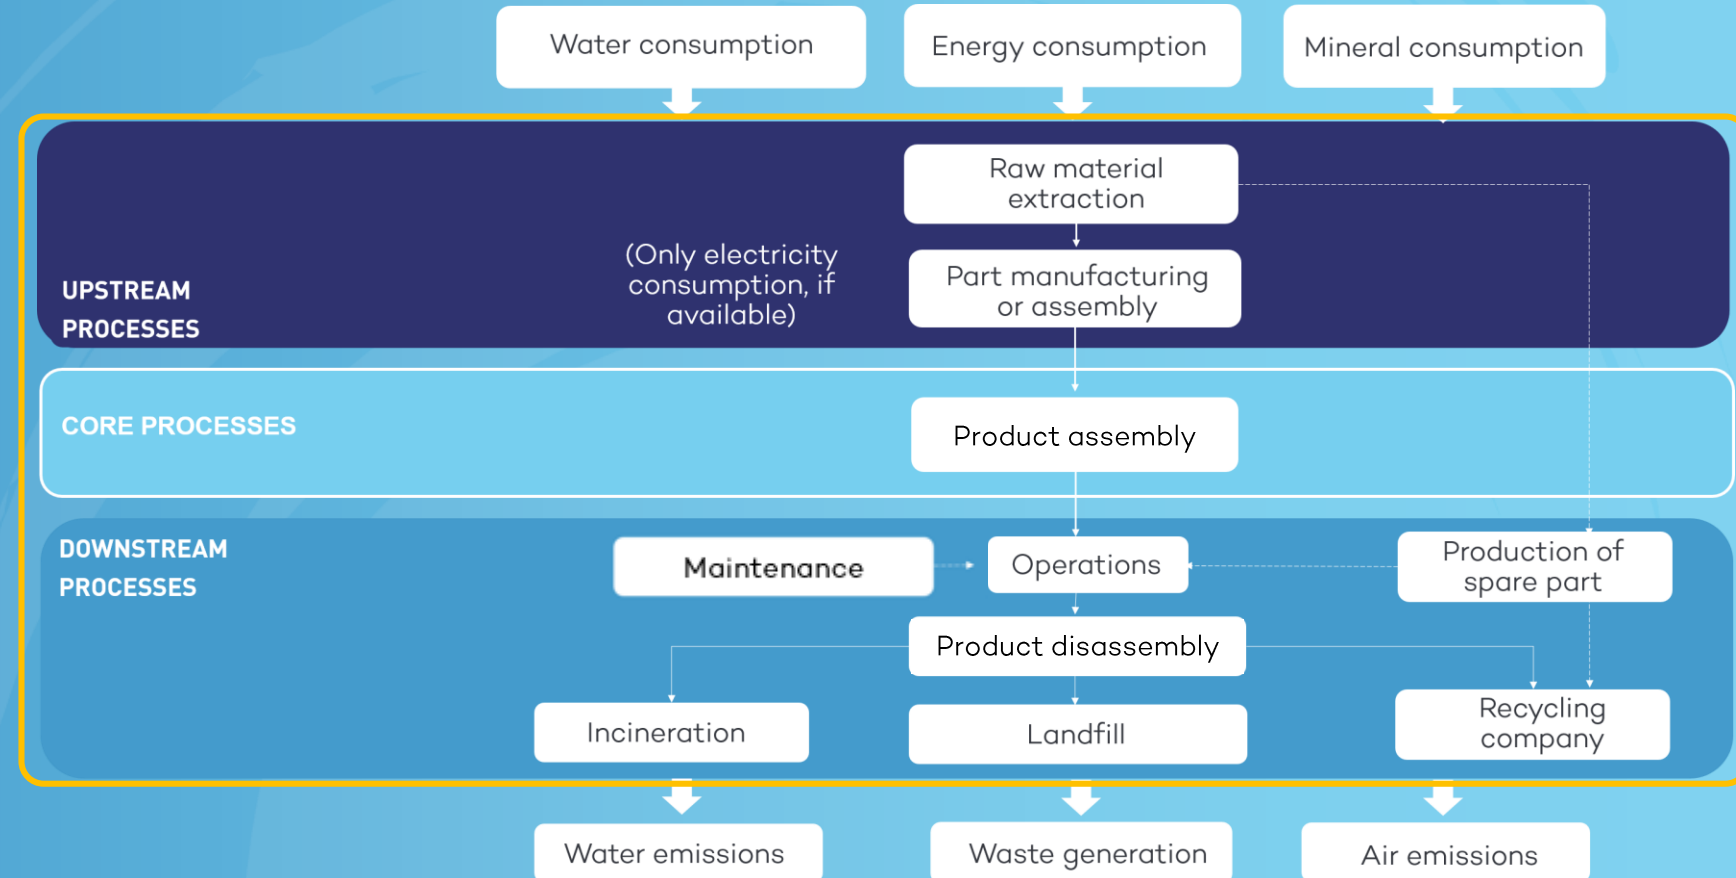

- Product submission: sharing its sustainability claims
- Solutions for
 - new-build
 - operations
 - refit stages
- Together we define the scope of the assessment, optimizing the insights

VERIFICATION PROCESS IN DETAIL

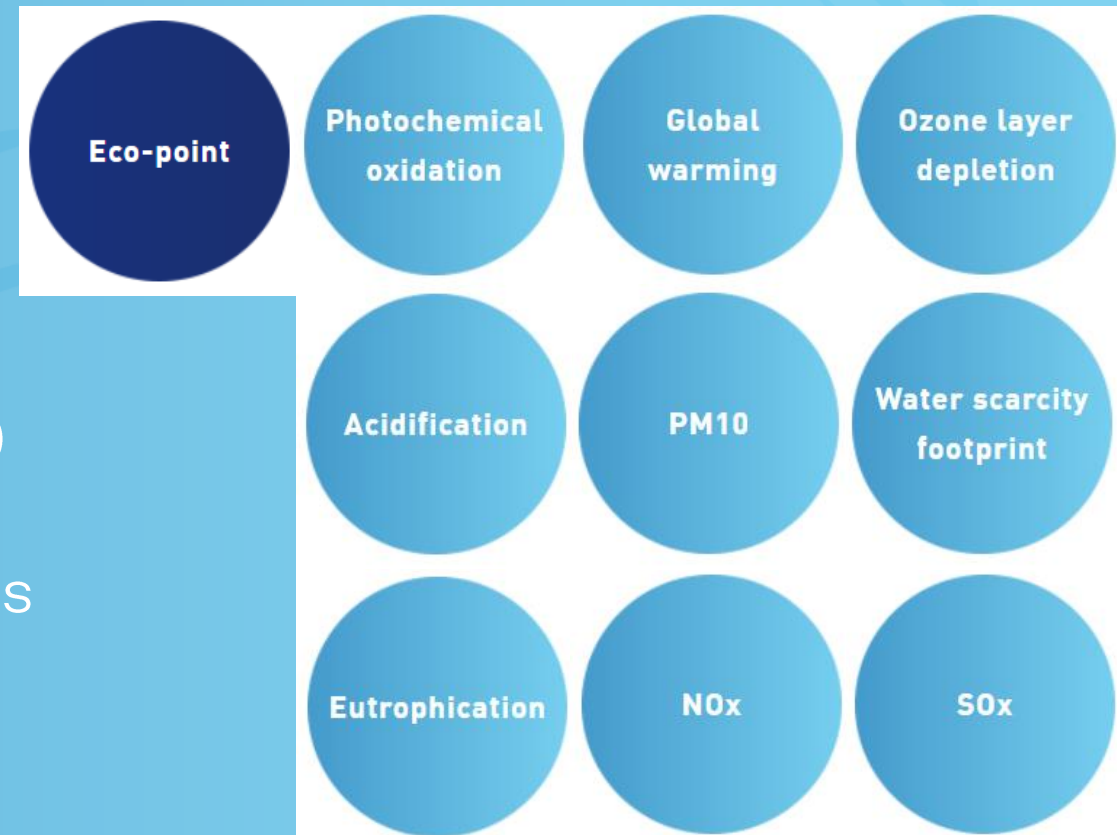

- Data sheet provided, guiding for the required input for life cycle assessment

VERIFICATION PROCESS IN DETAIL

- Environmental indicators are calculated for the product
- Based on a yacht's real operational profile
- Report generated, including insights on how the solution might even be further improved.
- Following ISO 14040:44 (standard for LCA)
- Performed by accredited research institutes
- Third-party verification

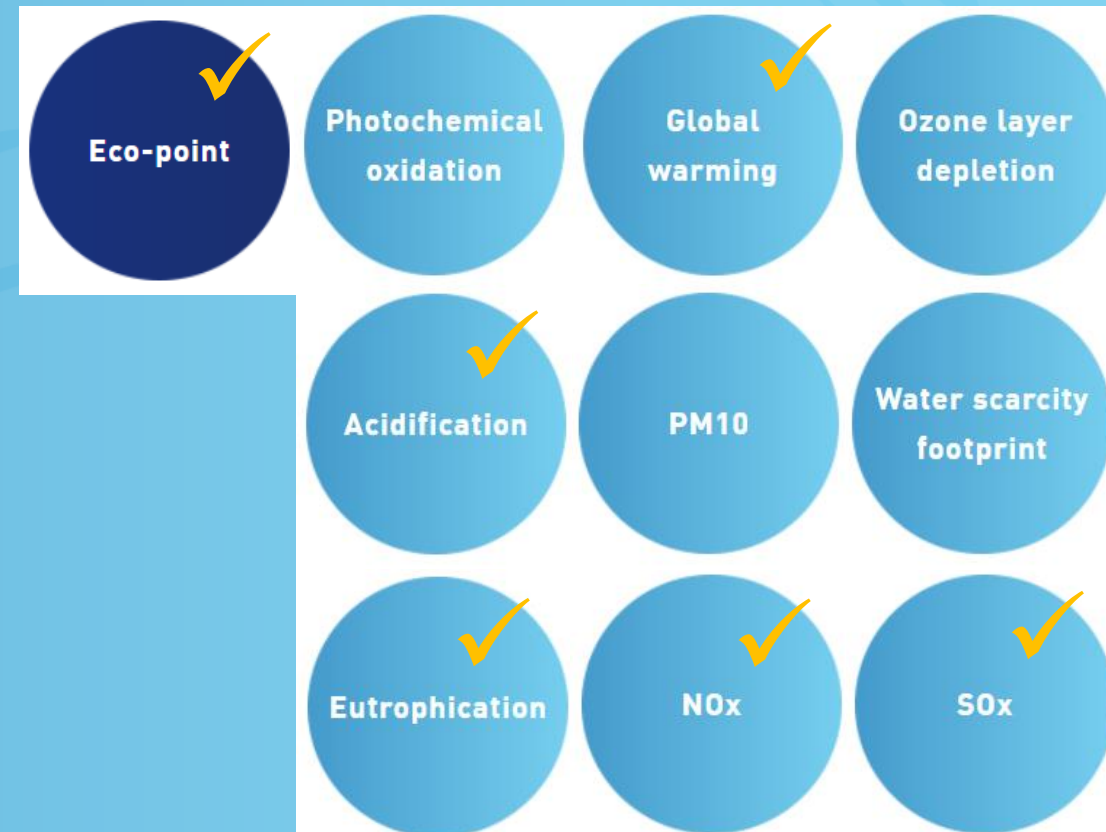

VERIFICATION PROCESS IN DETAIL

- Comparison to the Business As Usual (BAU), the solution gets verified and promoted on the database if it performs better in:

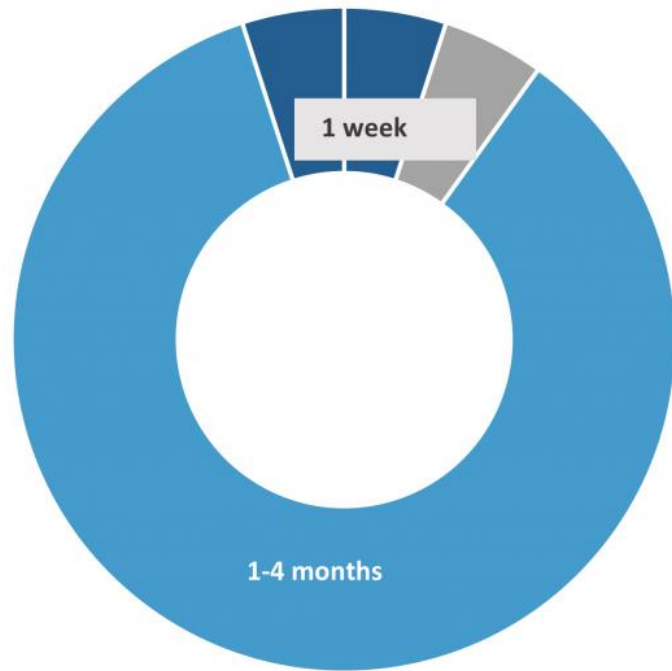

5 out of 9
environmental
indicators
+
the Eco-point

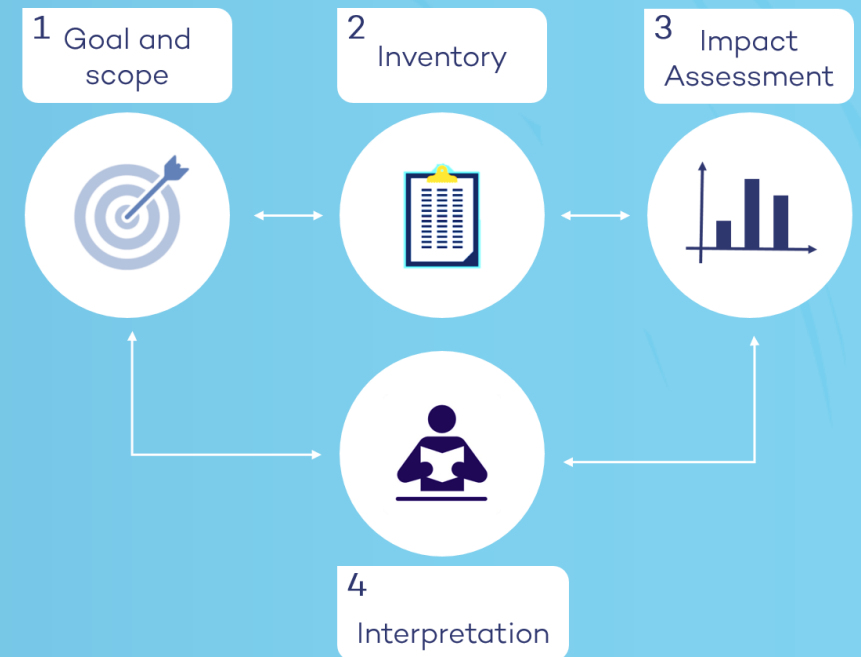

VERIFICATION PROCESS IN DETAIL

- The assessment process (data collection) is time consuming
- Let's get started as soon as possible and advocate the LCA approach!

- Step 1: Registration and submission of sustainable solution by supplier
- Step 2: Definition of the scope
- Step 3: LCA assessment, appraisal by WRF & research institute of the data provided
- Step 4: Declaring whether the solution is sustainable or not + provision of feedback

Opportunities

Together we can put sustainable technologies in the deserved spotlight and quantify scientifically the superiority of solutions from a life cycle point of view.

- ✓ Embrace LCA-based verification and get extra visibility on the database
- ✓ Confidential and detailed LCA report with 10 environmental indicators, taking into account the full life cycle of the product
- ✓ Contributes to your own sustainability goals and innovative image
- ✓ Brings you certainty to avoid greenwashing and empty claims
- ✓ Help the yachting community become future proof
- ✓ Supported by insurance company Pantaenius and yacht financier BNP Paribas

Endorse the mission to drive sustainability in the
superyacht industry.

Join the revolution.
