

WATER REVOLUTION FOUNDATION

The Foundation brings the superyacht community together to address the environmental impact and protect the oceans we depend on. Our programmes, projects, and collaborations turn ambition into practical tools and solutions that help move the sector forward.

Our work is rigorous, practical and led by the industry. By taking voluntary action, the community can help shape how environmental impact is defined, measured and addressed, rather than simply waiting for regulation to decide for us.

REDUCE

Lower energy consumption, minimise waste, and reduce water use across every stage of a yacht's lifecycle.

REMOVE

Address unavoidable emissions through high-integrity carbon removal and nature-based solutions.

RESTORE

Invest in ocean restoration and regeneration, moving beyond net-zero toward nature-positive impact.

Driving regeneration through the 3R Model.

Through a constructive and collaborative approach, we equip the yachting community with the tools, knowledge, and best practices needed to reduce ecological impact and actively restore ocean health.

By aligning ambition with measurable action, we accelerate the transition towards a regenerative future for yachting.

PROGRAMMES THAT DRIVE ACTION

Click the programme to find out more.

4 lifecycle stages. 1 shared direction.

From design to refit, the **Roadmap 2050** gives the superyacht community a measurable route to net-zero by 2050.

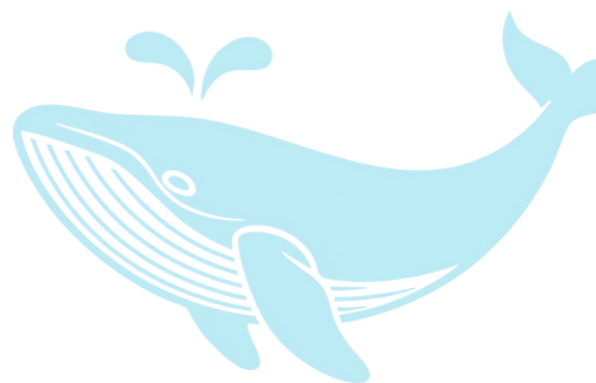

18 pollutants. One clear picture.

Yacht Environmental Transparency Index (YETI) measures a yacht's environmental footprint across 18 pollutants, helping identify where action can have the greatest impact.

1 OAU. 23 tonnes of CO₂ removed.

The **Ocean Assist Programme** combines verified carbon removals with regenerative contributions that help ocean ecosystems thrive.

16 verified solutions. 1 platform.

The **Hub of Verified Solutions** brings third-party, independently assessed, yacht-specific solutions together in one place so better choices can be made with confidence.

Industry courses. To build knowledge.

From crew to brokers and technical yacht assessments, each **course** gives professionals the tools to make informed decisions about the environmental development of yachting.

4 protocols. 5 industry committees.

Water Revolution Foundation plays a central role in mobilising industry collaboration, establishing environmental standards, and neutralising the footprint of the superyacht industry.
