

THE HUB OF VERIFIED SOLUTIONS

Superyacht procurement, environmentally proven.

HUB OF **VERIFIED**
SOLUTIONS

The Hub of Verified Solutions is the only directory of environmental solutions built specifically for the yachting industry, where every listing is independently verified. In an industry that relies on verified performance, environmental claims should meet the same standard, giving designers, shipyards, and procurement teams the confidence to make informed choices.

A LADDER OF ENVIRONMENTAL PROOF

Start where your data is today, then climb

The Hub has four tiers, showing increasing levels of verification and evidence behind environmental claims. Tier 4 represents the most comprehensive level of verification. The tiers reflect the depth of assessment, while lower-tier solutions are recognised for their environmental progress and supported as they work towards a full Life Cycle Assessment (LCA) or Environmental Product Declaration (EPD).

▲ VERIFIED & VISIBLE			
TIER 1 Certification & eco labels You have data, independently third-party checked.	TIER 2 Third-party audited data Certifications that procurement professionals trust and recognise.	TIER 3 Carbon footprint/ simplified LCA A rigorous, focused assessment, without cutting corners on credibility.	TIER 4 Full LCA & EPD, ISO certified Compared against a Business-as-Usual reference product, per ISO 14040/14044.
EVERY PARTNER ✓ WRF website ✓ Metstrade website ✓ QR code at events	ADDS ✓ Featured in quarterly blogs	ADDS ✓ Metstrade event ✓ Product working groups ✓ Social media spotlight	ADDS ✓ Primary visibility ✓ Verification stamp ✓ Speaking opportunity at events & panels

Benefits are **cumulative**: each tier includes everything in the previous tier and adds more.

BUILT FOR YOUR CATEGORY Suppliers across the whole yacht

- ✓ Onboard systems: HVAC, propulsion, water filtration, refrigeration
- ✓ Interior: furniture, textiles, flooring, decorative materials
- ✓ Fuel & emissions: alternative fuels, batteries, lubricants
- ✓ Toys & equipment: tenders, jet skis, water-sports gear
- ✓ Build & refit: naval architecture, hull, composites, structural materials
- ✓ Marina & shore side: shore power, charging, water treatment systems
- ✓ Maintenance & technical: condition monitoring, spare parts, repair
- ✓ Surfaces & coatings: paints, antifouling, protective finishes
